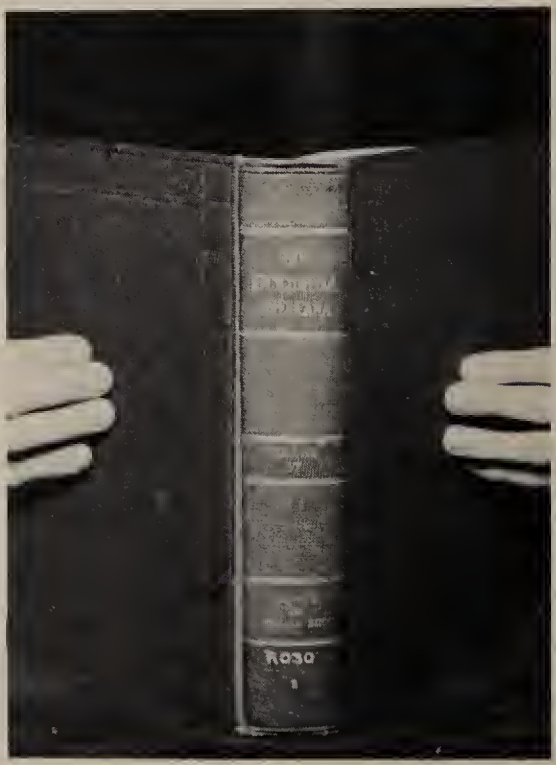
Appreciation

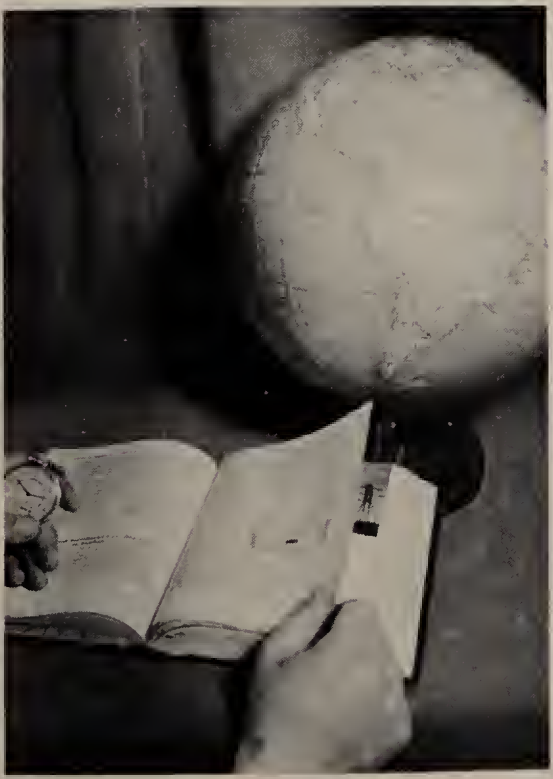
The staff of the 1956 Modulus is sincerely grateful to Professor Harry Stelling for his untiring efforts in the publication of this book.

When news reached the students that there would be no 1956 Modulus, the campus was in a state of frustration but no one wished to lead a group to get it back. Through the Student Council, Professor Stelling, with a few students, prepared a report which was instrumental in the return of the yearbook.

The staff is deeply indebted to Professor Stelling who gave so willingly of his time that this yearbook might be a success.



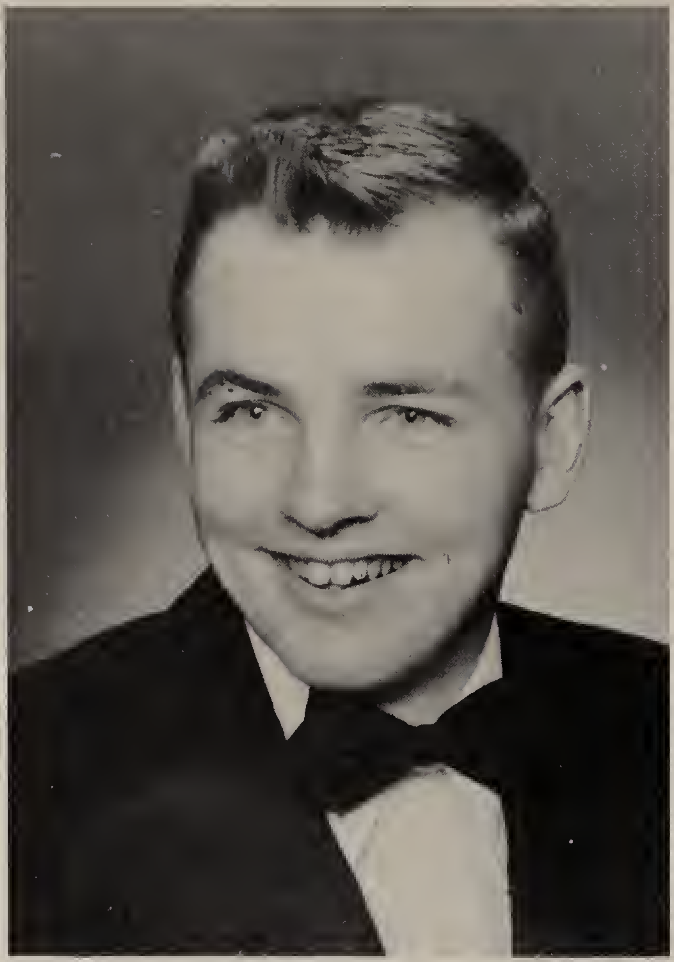
Dedication



This book is dedicated to Roy A. Fruehauf, who is a member of the Board of Trustees at Tri-State College.

Every student will benefit from Mr. Fruehauf's addition to the board, for it was he who was instrumental in the inauguration of the Motor Transportation course now being offered. Mr. Fruehauf has also offered numerous scholarships to qualifying students.

We, the staff of the 1956 Modulus, wish to thank Mr. Fruehauf for his untiring efforts to make Tri-State College a bigger and better college.



Foreword

This has probably been the most difficult yearbook ever published at Tri-State College. Upon entering into the year 1956, the Modulus was something of a bygone day. Through the efforts of a few students the Modulus was again brought to life.

I hope this yearbook will be cherished by all as you thumb through it and recall your college joys.

I would like to take this opportunity to thank the members of the staff who gave so willingly of their time and efforts to help make this book a success.

Entrance To Tri-State College

To the Members of the Graduating Classes:

Each of you is to be congratulated for at least two reasons. First, because you chose a goal in higher education and second, because you achieved it.

In so doing you have set yourself apart from the majority of your fellow citizens in your age group. As one recent commencement speaker so aptly expressed it, you have become the uncommon man and woman. This is a well deserved distinction now and it will continue so as long as you make the best use possible of your education and training.

It is apparent, therefore, that the end of your formal education is but the threshold of new opportunities and new responsibilities. For every one of you it is our wish that you recognize your opportunities with eagerness and enthusiasm and our hope that you will meet and discharge your responsibilities with courage and conviction.

The field of Aeronautical Engineering, in its infancy only two decades ago, has rapidly become an established member of the engineering family. Continuous changes, developments, and advancements make this profession the most challenging of them all.

In order that the student may be suitably prepared for entry into the profession, the course in Aeronautical Engineering has been organized in such a way that it is thorough in basic theory and yet sufficiently flexible in applied theory that it may be varied to fit developments in the field.

A well-rounded foundation in physics, chemistry, mathematics, mechanics, and machine design supports both basic theory and applications in Aerodynamics, Aircraft Engines, Aircraft Design, and Stress Analysis. Wind tunnel testing and structural testing supplement class work in aerodynamics and structures. The goal of the course arrangement is to give the student sufficient specialized training to prepare him for entry into the specific field of Aeronautical Engineering and yet not overemphasize Aeronautics to such degree that he may be unsuited in other fields of engineering.

Due to rapid industrial development, there has been a growing demand for men trained in both chemistry and engineering.

The chemical engineer may find employment in a great variety of industries, such as the refining of petroleum into Gasoline, lubricating oils, and waxes; production of coal products, coke gas, light oil, and tar; processing of this tar into dyes, drugs, perfumes,; wood pulp products; the manufacture of sulfuric acid, caustic soda, chlorine, and other chemicals; tanning leather; manufacture of soap and organic chemicals; cement, pottery, and other ceramic products; the extraction of metals from ores, and their purification.

The chemical engineer sometimes begins his work in the chemical laboratory which makes necessary a knowledge of analytical chemistry. Even in later work this knowledge helps in the proper interpretation of analytical reports.

CHEMICAL LABORATORY

Department Of Civil Engineering

The work of the Civil Engineering course is intended to teach the students the fundamentals of civil engineering practice, and to point out the importance of sound theory as the basis of all practical engineering problems. It is also intended to give the sources from which they can find the information necessary to make successful surveyors, highway, municipal, and railroad engineers, and to help structural engineers in timber, steel, and concrete design.

The civil engineer does not always achieve his greatest success from his background of technical training, although the habit of thought acquired during this period often trains him for executive and administrative work. The planning and executing of important work bring to the surface qualities of leadership. Biographies of great men reveal that many of them were civil engineers. The exactness of reasoning instilled in the mind of the student is such that he becomes a thinker and a builder who can build and organization as well as a structure.

When one considers the many different branches of the work and the possibilities of each, it seems reasonable to think that one's opportunities are unlimited in this great field.

Since Benjamin Franklin's experiments, electricity has revolutionized our life. Electric power, its generation, transmission, and utilization "on land, at sea, and in the air," in industry and in the household are the concern of the electrical engineer. Electrical standards and codes are being raised to higher levels, and the call is for properly trained men who can work up to the highly responsible positions. The Department of Electrical Engineering was founded at Tri-State in 1909. The 300 Building houses this department.

A well-balanced course in electrical engineering requires not only the necessary application of mathematics and science as taught in the classroom, but such laboratory work and drill as will offer the student a chance to apply the theory he has learned in the class room, thus equipping him to enter the many electrical engineering vocations upon the completion of his course.

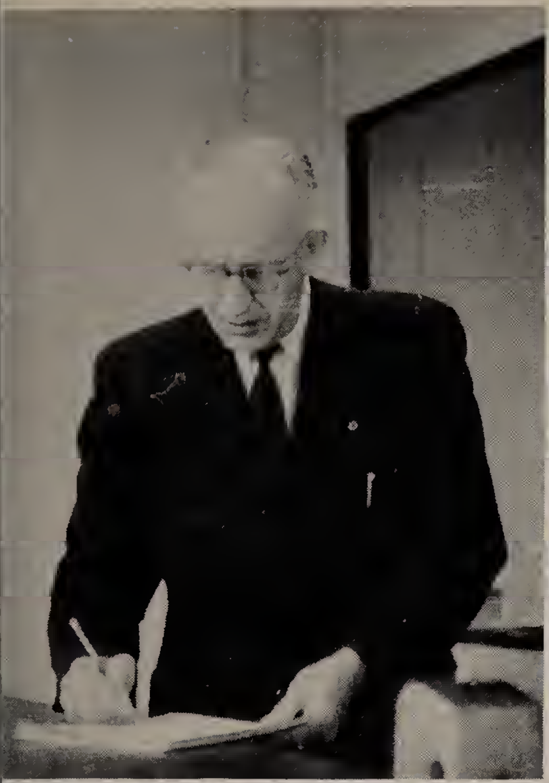
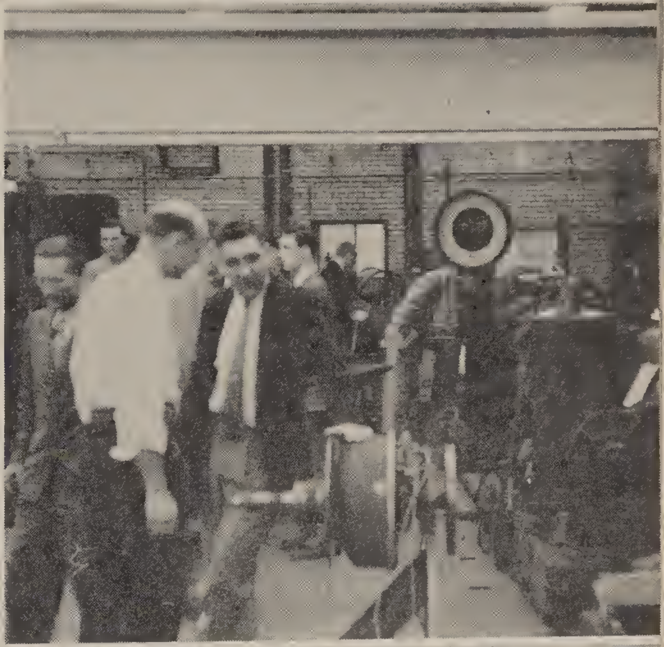
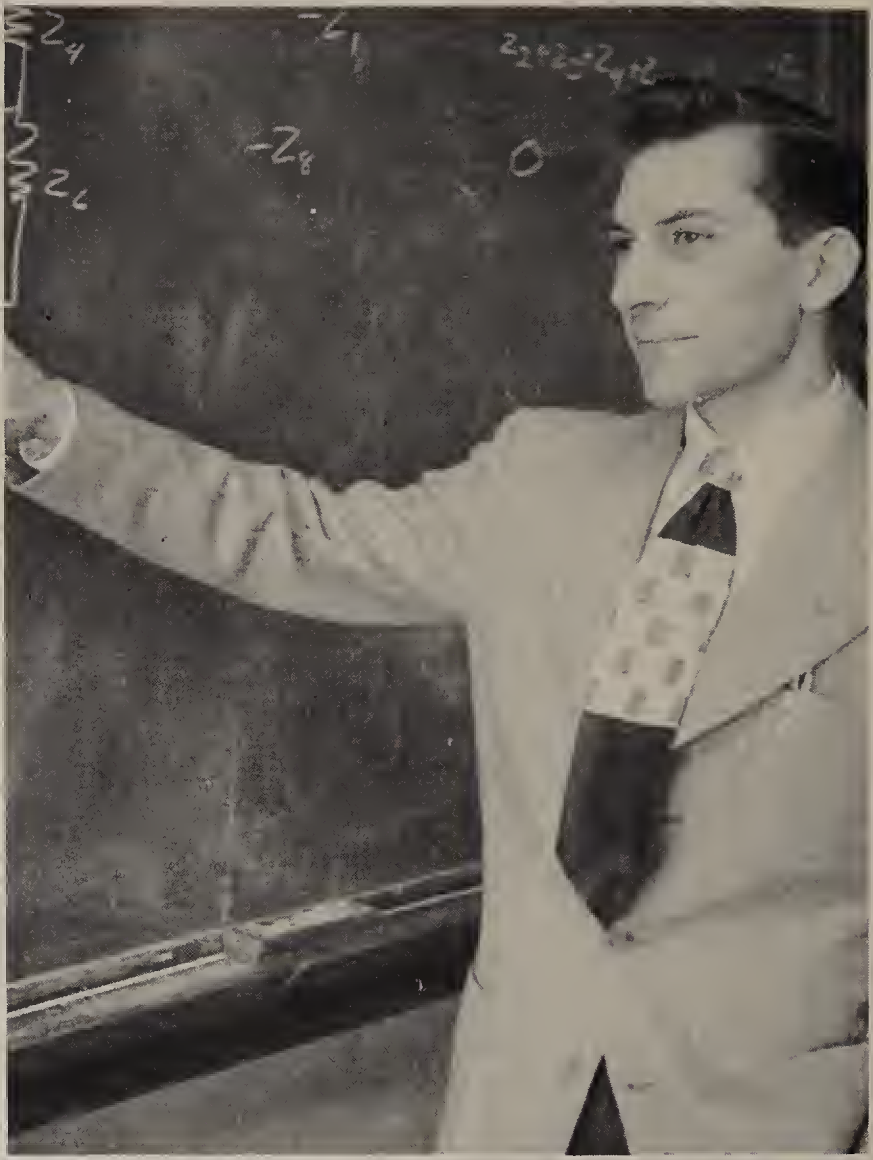
The field of mechanical engineering is essentially basic, borrowing, as it does, fundamentals from all other fields of engineering, and permeating all of our present day industrial world. It would be difficult to name any field of industry in which mechanical engineering problems are not met. These problems have their origin in the design, the manufacture, the choice, and the operation of mechanical equipment. This equipment may be used in manufacturing anything from a needle to an ocean liner, or it may be used in transportation by land or sea or air. It may be used in power production, in heating and air conditioning, in refrigeration, in agriculture, in steel making or in any of the other phases and fields of industry. The mechanical engineer may find his work in problems involving the economic choice of equipment. With such detailed knowledge of equipment and its functions, the mechanical engineer is well fitted for the profession of sales engineering. Works management is another field in which the mechanical engineer often specializes. Indeed the basic nature of a good mechanical engineering course, can be said to form the ground work for many types of work in almost any industry.

MECHANICAL LABORATORIES





Department Of Radio Engineering



The technical course in Radio Engineering is methodically arranged to include only essential subjects. The curriculum embraces instruction by text book lecture, laboratory drafting, and designing practice. The Radio Engineering graduate is expected to possess a mastery of radio circuits and apparatus, as well as all those fundamental subjects which form the basis for professional engineering practice.

In order that the student be able to gain a real knowledge of Radio Engineering and its various phases, he must have a thorough appreciation of physical theory, a clear understanding of chemical principles, and a broad working knowledge of mathematics. This training is accomplished in the class rooms through lectures and home study. It is imperative, however, that this work be supplemented with extensive laboratory practice and report writing.

Department Of Commerce

Ronald Pufahl

The work in the Department of Commerce is designed to qualify the student for one of the many responsible positions in the field of modern business. The course is so outlined that the first four terms are devoted to general foundation courses of accounting, business law, economics and finance. These courses are followed by more specialized instructions in the fields of advertising, credit, purchasing, selling and transportation. A twelve-term course in administrative engineering is also included in the department's curriculum.

There was a time when business executives felt that it was not necessary for men entering the field of business to possess a formal education. There grows today, however, an ever increasing demand for college graduates with a foundation of general business elements to fill vacancies for responsible positions. It is an accepted fact that formal instructions will shorten apprenticeship necessary to fill these positions.

An Engineers Lament

The time had come to take the tall
Of an engineer's reckoning on St. Peter's scroll,
St. Peter paused and looked again,
"Oh No," said he, "not another Tri-State man!"
Come on son, now take your turn,
Your deeds of the past I must learn."

The more recent records did say,
That I have certainly had my day.
Let's not forget how I did strive
In the drafty house on Victory Drive,
Each stress and strain I had to bear
Are carefully recorded for all to hear.

It was a rough and weary grind
Of the life in Angola which I left behind.
The nights were short and the days so long,
Nothing went right, evreything wrong--
The summers were hot, the winters bleak,
The bills kept piling at my feet,
My rent was paid until last fall,
But water was free with rust and all.
They raised the tuition and changed the books,
They bled me my money those learned crooks!

The alarm went off with the rise of sun,
My 20 hour day had just begun,
Sipped some coffee and grabbed my books,
A glance in the mirror to check my looks,
The reflection there was no surprise,
I was always there with bleary eyes.
A skip and a hop, I was off on time
Made it to Steam right at nine.
Couldn't be late, couldn't be slow,
Hemmert's glare was a deadly blow.

Next in line was Strength at ten,
I didn't have the strength to lift my pen,
Byers the teacher, was often on a rage,
Each day's assignment, 3 chapters to the page.

Please Refrain from Loud talking
AND BUNKO-STEERERS,
LEO BIM DONAHUE alias
Billy Mullin, Little Jack, The Cuter, Pock-Marked Kid, and about Twenty Others.
100 Substantial Citizens

My lunch hour varied from ten till four,
A sandwich with indigestion and work some more.

Twelve to one found me in Mechanism
I always left there with worry-ism
Holcomb said, "Now get this straight,
If you don't learn this, you'll meet your fate."

Again at two, I was on the go
To Oleson's class, the so and so,
"Boys tomorrow," he'd say with glee,
"A full hours test in Mechanics Three."

Labs, a must, in every quarter,
A living proof I was a martyr,
The blood to sweat on those machines,
Reports to prove that I had been.

The teachers, the classes, the writers cramp,
Deciphering files by the mid-night lamp.
The dear Father Himself did scratch His head,
Over some of the problems Mr. Humphries to us fed.

I couldn't keep up with Andolina,
In Machine Design, was anyone keener?
Some profs were omitted for lack of space,
But all bull sessions showed few in grace.

At every dinner my wife disclosed
Hamburger dishes as cold as my toes,
And coffee strong enough to send
All my hair to stand on end.

The evening descended all too soon
There I'd sit in the smoke filled room,
Bent over my desk and hoped to strive
For answers to problems before morning arrived.

And so, St. Peter, you have my story,
Now I've come to claim my glory,
St. Peter smiled and rang the bell
Come in son, you've been to H---.

Skull And Bones, C.O.A.

In the spring of 1948 the foundation was laid for Skull and Bones, C. O. A., an Honorary Society. Membership in Skull and Bones, C. O. A., is by election and based on the student's participation and leadership in campus organizations and activities. The purpose of this honorary organization, national in scope, is to recognize outstanding leadership of students in extra-curricular activities, to encourage and promote student activities, to stimulate student brotherhood and spirit, and to forever honor, to the highest degree, the traditions and prestige of Tri-State College.

TRI STATE COLLEGE

Tau Sigma Eta

Tau Sigma Eta, honorary engineering society, was incorporated under the laws of the state of Indiana, on April 10, 1930. Membership in this society is one of the rewards received by students for outstanding achievements in the School of Engineering.

Requirements for admission into membership are four quarters of college work with a minimum of twenty hours work during each of the four quarters; a scholastic average of 2.1 out of a possible 3.00; with no more than five C's or C-plus. A grade of D or lower disqualifies a student for membership. An average of A for three successive quarters automatically creates eligibility for membership. Members of the society must maintain an average of 2.0 to be considered active.

Tau Sigma Eta encourages brotherhood and good fellowship, a well balanced social program, and the maintenance of high scholastic records. A banquet is held each quarter as a climax to the quarter's activities and aids in encouraging and fostering the ideals of the society. The used book sale at the beginning and end of each quarter is one of the organization's functions.

Tri-State Student Directors

The Tri-State Student Directors, an officially recognized honorary organization, was instituted during the Winter Quarter 1954. Membership, which consists of representatives from all phases of campus life, is by selection and is based on leadership, dependability, cooperation, scholarship, and a desire to promote the welfare of the college. The basic function of the organization is service. Some activities with which the Directors are specifically identified include, Orientation for new students, Registration, Baccalaureate, Commencement, Alumni Homecoming and the annual Christmas Party for Tri-State children. The organization is closely associated with the office of the Dean of Students.

Alpha Beta Alpha

Alpha Beta Alpha, the honorary society, was founded in September 1938. The Society was created to recognize outstanding leadership among students in the School of Commerce. The object of the Society is to create an enthusiasm for scholarship, to promote leadership, and to develop charactership.

Those who, through a combination of ability and earnest effort, become members, deem it a worthy honor as is evidenced by the active support and interest taken in the Society by the alumni members. Under the guidance of Professors H. R. Hoolihan and H. W. Hoolihan, the Society encourages its members and all future members to maintain a high scholastic standing. To be eligible for membership, a student must maintain an average grade of "B" for four successive terms with no more than one grade of "C" or an average grade of "A" for three successive terms.

The high ideals set by Alpha Beta Alpha as a standard could well serve as a goal for all students in the School of Commerce.

Alpha Sigma Phi was founded at Yale University in 1845 and is the tenth oldest national social fraternity. It is one of the larger fraternities and is a charter member of the National Interfraternity Conference.

The Beta Omicron Chapter dates back to 1925 when it was known as the Phi Lambda Tau Fraternity. Four years later, Phi Lambda Tau merged with Alpha Delta Alpha, a national fraternity. In 1935, Alpha Delta Alpha disbanded but through the efforts of its local members, a chapter of Alpha Kappa Pi, another national fraternity, was obtained. Eleven years of prosperity passed before Alpha Kappa Pi decided to merge with another great fraternity to form Alpha Sigma Phi.

On September 6, 1946, the local chapter became the Beta Omicron of the Alpha Sigma Phi fraternity.

Alpha Sigma Phi stands for charity, culture, loyalty, and perpetual friendship. Its members face a future made brighter by the flame of the personal relationships kindled in the walls of Alpha Sigma Phi.

Beta Phi Theta was founded at the Milwaukee State Teachers College in November, 1917. The first social fraternity at the College, it flurished purely as a social organization in its first few years. In 1932, plans were made for expansion, and when the first national convention was held in June, 1942, three chapters responded to the roll call. Since that time, other strong local fraternities from other institutions have become affiliated with Beta Phi Theta.

The history of Delta Chapter, the Tri-State College Chapter of Beta Phi Theta, dates back to 1922, when a group of young men banded together as "The Four-Eleven Gang," their sole purpose being the promotion of good fellowship. So successful was the organization that it was decided to expand to afford other students the opportunity of enjoying this relationship. At this time, Lambda Phi Epsilon was formed. The membership of this fraternity grew, and recognizing one of the great needs of the college students, opened the first fraternity house at Tri-State College in 1925. Four years later, when the college recognized fraternities, the members of Lambda Phi Epsilon realized the advantages of national membership and became the Delta Chapter of Beta Phi Theta.

Delta Chapter now in its' twenty-seventh year at Tri-State, has never lost sight of the ideals of its founders. Those chosen for brotherhood are men with courage, initiative and fortitude. This policy of selection has insured lasting life and leadership for the Fraternity and has made Beta Phi Theta one of the outstanding organizations on the campus. Scholastically, morally, physically and socially, the members of Delta Chapter are pledged to contribute their best, and will in the future, be more than proud to share the progress of the college, the fraternal body, and their fellow-students.

Alpha Delta Gamma, the wives group of Beta Phi Theta fraternity, was formed in February of 1955. This group was formed primarily to bring the wives closer to the fraternity. They undertake various projects towards the improvement of the fraternity house.

This group meets on Wednesdays twice a month. There is a short business meeting followed by a social and refreshments. The wives enjoy the meetings because it gives them an opportunity to get better acquainted.

Beta Sigma Tau

Equality, Understanding, Unity

Beta Sigma Tau's chapter at Tri-State College had its beginnings on October 13, 1950, when Theta Mu Pi officially affiliated with the national fraternity, Beta Sigma Tau.

Beta Sigma Tau was founded in May, 1948, at Chicago. The first convention consisted of seventy-five delegates from eleven colleges. A constitution based on equality, understanding, and unity was adopted.

Beta Sigma Tau is unique because membership is not restricted because of race, creed, or religion. Prejudice on a college level is ignorance, and not intelligence.

In 1937 the Jewish undergraduates on the Tri-State campus formed a Jewish fraternity. The chapter was active until the outbreak of World War II when the chapter was temporarily discontinued because of the membership going into the Armed Forces. After the war, Theta Mu Pi elected to become a non-sectarian organization. The aim of the new organization was to foster the educational, social and spiritual life of its members. This chapter became Beta Sigma Tau at Tri-State College.

Indiana Gamma chapter of Kappa Sigma Kappa, international social fraternity, took its place among the campus fraternities on March 17, 1952. While new in name, the fraternity has proved its worth as one of the older organizations on the campus.

Kappa Sigma Kappa was founded at Virginia Military Institute in 1867. For many years following the Civil War, new chapters were installed, mainly in southern colleges, but since 1935, a chapter has been installed in nearly every state, as well as in several foreign countries.

Today, Kappa Sigma Kappa has more than sixty active chapters.

Alpha Gamma Chapter of Phi Kappa, at Tri-State College, is the result of earnest efforts on the part of the members of the organization once known as Alpha Gamma Omega. In May, 1943, a charter was sought from Phi Kappa National Catholic Fraternity, and on January 24, 1944, the Alpha Gamma Omega fraternity became the twenty-seventh chapter of Phi Kappa fraternity.

Amang the many achievements of the chapter in Phi Kappa have been endeavors to maintain the high scholastic standards set by predecessors, as well as participation in all inter-fraternity activities. The main purpose of the group of the Tri-State campus is to aid each member in bettering his efforts in learning; the development of a sense of responsibility and loyalty; the instilling of a fervent desire to contemplate creatively and to act constructively for the advancement of the organization.

Phi Kappa is proud of its accomplishments, and the members are confident their ideals of fraternalism and religion will carry them to ultimate success in their undertakings.

The Alpha Chapter of Sigma Mu Sigma Fraternity was founded at Tri-State College on March 25, 1921, by three Master Masons. This organization was the first fraternity on the campus, and has the distinction of being the oldest recognized fraternal organization at Tri-State.

The Union of Square and Compass and Sigma Mu Sigma was consummated in Angola, Indiana, on August 3, 1952. The fraternity now has nine chapters throughout the country.

Brothers of Sigma Mu Sigma are proud of its history and achievements in the scholastic and social phases, and are continually striving to surpass the goals set by previous memberships. The fraternity's earnest desire is to develop men capable of taking their places in the world with confidence in their ability to meet and to associate with other men. Toward this end, the men of Sigma Mu Sigma will continue to strive.

Sigma Su's

The Sigma Su's Club is made up of wives of members of Sigma Mu Sigma Fraternity. The purpose of the Sigma Su's is to promote closer relationships between the Fraternity and the wives' organization. The Sigma Su's also aid the Fraternity in projects within the "house." The Su's meet in the living room of the Fraternity House.

The Sigma Su's were first organized some years ago but the organization dwindled out and was later re-activated in January, 1954, with four members, Jaann Freathy, Gloria Crail, Jaan Gaadship, and Wanda Davidsan. The only elected officer is a secretary, elected each quarter, who keeps minutes, directs meetings and also collects and accounts money.

"A SIGMA PHI DELT IN EVERYTHING, AND EVERY SIGMA PHI DELT IN SOMETHING"

Above stands a motto, which all "Phi Delts" strive towards, remembering also that "Sigma Phi Delta is everything and every Sigma Phi Delt is something."

Presented here within this enshrined portion of this Modulus are some of the Brothers of Kappa Chapter of Sigma Phi Delta. Popularly known on campus as the "Engineering Fraternity", Kappa Chapter was founded on the Tri-State Campus May 25, 1947, when our founder, Professor LeRoy C. Horpedahl, a former "Phi Delt", saw need for an engineering fraternity at Tri-State. Professor Lyle D. Olleson became the first chief engineer and hence Kappa Chapter was formed. A visit to our castle will show proof that the Brothers have kept the motto's in mind at all times, and fully carried them out.

Sigma Phi Delta is one of the three official engineering fraternities of the Professional Inter-Fraternity Conference. The membership being international truly increased the Brotherhood of all engineers.

Inter - Fraternity Council

The Inter-Fraternity Council is the fraternity man's Congress, serving to unite the mutual interests of member fraternities and to promote better and closer relationships within the faculty, student body, and fraternities.

Two representatives from each fraternity recognized by the college are authorized to attend meetings each week to plan and direct fraternity activities on the campus. Operating with the full cooperation of the faculty, the council plans social and athletic activities for the student body. Fraternity representatives, acting with the guidance and on suggestions of their fraternities, exercise initiative and leadership in supervising the affairs of the council.

The Inter-Fraternity Council has grown to be one of the most effective organizations on the campus, through the action of well-qualified fraternity representatives.

The Aeronautical Society of Tri-State College is a student branch of The Institute of the Aeronautical Sciences, the national professional organization of aeronautical engineers.

The meetings of the society provide excellent information in the form of special speakers from industry, and pamphlets and circulars, concerning various phases of aeronautics.

The main social event is the Aero Banquet. At this event the officers for the coming term are installed and awards are given to outstanding members. A prominent representative from the field of aeronautics is usually invited to highlight the event with a speech.

Chemical Society

The Chemical Society has been a student affiliate chapter of the American Chemical Society since July, 1948.

Objectives of the chapter are to afford an opportunity for the students of Chemical Engineering at Tri-State College to become better acquainted, to secure experience in preparing and presenting technical material before chemical audiences, to foster a professional spirit among the members, and to instill a professional pride in chemistry.

These objectives are furthered by bringing before students both the old and new theories of the field. These theories are presented and explained by well known guest speakers from the fields of chemistry and Chemical Engineering.

Motion pictures of the highest standards are shown and field trips are made whenever possible. This year's field trip was to the National Chemical Societies in Indianapolis.

The members of the Chemical Society wish to express their appreciation for the fine work of the department faculty and to wish every success to the members of the graduating class of 1956.

I am a Civil Engineer. In my profession I take deep pride, but without vain glory; to it I owe solemn obligations that I am eager to fulfill.

As an engineer, I will participate in none but honest enterprise. To him that has engaged my services, as employer or client, I will give the utmost of service and fidelity.

When needed, my skill and knowledge shall be given without reservation for the public good. From special capacity springs the obligation to use it well in the service of humanity, and I accept the challenge that this implies.

Jealous of the high repute of my calling, I will strive to protect the interest and the good name of any Civil Engineer that I know to be deserving; but I will not shrink, should duty dictate, from disclosing the truth regarding anyone that, by unscrupulous act, has shown himself unworthy of the profession.

Since the age of stone, human progress has been conditioned by my forebears. By them have been rendered usable to mankind nature's vast resources of material and energy. By them have been vitalized and turned to practical account the principles of science and the revelations of technology. Except for this heritage of accumulated experience my efforts would be feeble. I dedicate myself to the instruction and dissemination of engineering knowledge, especially to the younger members of my profession in all its arts and traditions.

To my fellows I pledge, in the same full manner I ask of them, integrity and fair dealing, tolerance and respect; devotion to the standards and the dignity of our profession; with the consciousness, always, that our special expertness carries with it the obligation to serve humanity with complete sincerity.

The Radio Engineering Society

The Radio Engineering Society, organized in October 1936, provides students interested in radio and electronics with informative sessions to supplement the regular curriculum.

The meetings of the society are held on Monday evenings. The purpose of these meetings is to promote the aim of the society, the advancement of practice and theory of radio and its allied branches of engineering. These aims are promoted and furthured through a program of outstanding speakers and films.

Included among the speakers each year are representatives from the large manufacturing firms. These representatives acquaint the members with the process of securing a job. Other speakers include men outstanding in the industrial field who bring practical experience and information to the members.

Membership in the society is open to all who are interested in the field of radio.

Society of Automotive Engineers

The Society of Automotive Engineers is a technical society whose members are devoted to the development, design, production, operation and maintenance of passenger cars, trucks, buses, aircraft, railroad and farm equipment, and their fuels and lubricants.

The first meeting of the SAE at Tri-State College was held on February 3, 1949. Since that time this progressive society has grown to be one of the largest on campus and now has an enrollment of 176. This is the highest membership in the chapter history.

The charter was granted on January 13, 1950, thus establishing Student Branch status. There are 45 charter members. The aims of the Student Branch are the aims of the society itself: "To promote the Arts and Sciences and Engineering practices connected with the design, construction, and utilization of automotive apparatus".

Literature and speakers or technical movies are presented at meetings which are held the first and third Wednesdays of every month. The programs are planned to supplement the Engineering curriculum.

The Student Council of Tri-State College was organized for the promotion and advancement of campus activities for the college students. The Student Council is an organization in which the views and opinions of the students may be expressed.

The council is composed of representatives from the various student organizations on campus. These representatives are to attend all meetings, participate in Student Council activities and keep their organization informed of all council business. It is the hope of the Student Council that the high ideals toward which they have striven will be developed to a greater degree in the years to come.

Tri-State Christian Fellowship

List of Officers - June '55 to June '56 - President, Kenneth Jones; Vice-President, Harold Gesell; Secretary-Treasurer, Arnold Brown; Missionary Secretary, Richard Geide.

Tri-State Christian Fellowship is a chapter of Inter-Varsity Christian Fellowship, which is a member of the International Fellowship of Evangelical Students. There are 895 organized chapters in the United States.

The aim of the Inter-Varsity is to lead students to a personal faith in Jesus Christ, to deepen the spiritual life of students through Bible Study, prayer and Christian Fellowship, and to call out students to the mission field. The Fellowship through it's 60 staff members, seeks to encourage and help students organize and maintain local groups.

There are several summer training camps throughout the United States where Inter-Varsity provides leadership training for students. In addition to the camp program, Inter-Varsity provides a year-round schedule of week-end conferences to encourage spiritual development among college and university students.

Junior Chamber of Commerce

SUMMER 1955 - President, Donald Tebo; Vice-President, Garnit Stamm;; Secretary, Clarence E. Emrey; Treasurer, Don O'Neil.

FALL 1955 - President, Leamon Miller, Vice-President, R. D. Thimlar; Secretary Lloyd Gardner; Treasurer, Joseph G. Jelley.

The Tri-State Chapter, Angola Junior Chamber of Commerce, was organized during the winter quarter 1954, and as such was the first program of its kind on any college campus in the United States.

Our main purpose is training young men for leadership. This program concerns civic improvements, both on and off the campus.

The Jaycee has a definite purpose expressed in his creed.

WINTER 1956 - President, Lloyd Gardner; Vice-President, Joseph G. Jelley; Secretary, John W. Metzger; Treasurer, R. D. Thimlar.

SPRING 1956 - President, John W. Metzger; Vice-President, R. D. Thimlar; Secretary, Thomas J. Hudson; Treasurer, Jack Taylor.

The Jaycee Creed

We believe:
That faith in God gives meaning and purpose to human life;
That the brotherhood of man trancends the sovereignty of nations;
That economic justice can best be won by free men through free enterprise;
That government should be of laws rather than of men;
That the earth's great treasure lies in human personality;
And that service to humanity is the best work of life.

Photographic Society

SPRING 1956 - President, Donald C. Loomis; Treasurer, John R. Lavy; Secretary, Joseph Thaxton;; Faculty Advisor, Mr. C. D. Kenyon.

Since the inauguration of the Photographic Society in 1946, regular contributions to student and outside publications have made the Society an important factor in promoting Tri-State College pictorially. Besides being invaluable in this respect, the Society provides a pleasant and useful pastime for its members, and gives them access to excellent equipment, supplies, and facilities. The Photographic Society plays an important part in the advancement of Tri-State College.

Booster Club

SUMMER-FALL 1955 - President, Roger Zank; Vice President, David Whitney; Secretary, Ann Cunningham;, Treasurer, Robert Stein.

The Tri-State College Booster Club, has as its main objective, the never ending task of keeping student interest high; both in the athletic programs and in social events.

Membership in the club is open to any student or faculty member of Tri-State College who is interested in extracurricular activities, and who wishes to aid in the betterment of same. In addition, every fraternity and student organization on campus may send a representative to the Booster Club. By means of these representatives the club is better able to make all students aware of the activities currently in progress.

WINTER-SPRING 1956 - President, David Whitney; Vice President, Charles MacLoughlin; Secretary, Mary Etta Grandys; Treasurer, Whilston Taylor.

Notable among the accomplishments of the club are: the annual Float Parade preceding the first home game of the basketball season, the operation of the Cheerleading Corps, the selling of tickets and the distribution of programs during the basketball season, the annual "Beat Tech. Bus" which takes rooters to the away game with Indiana Tech., and the sponsorship of informal dances.

From a handful of interested persons, the Booster Club has fast grown into an organization of great importance on the campus scene.

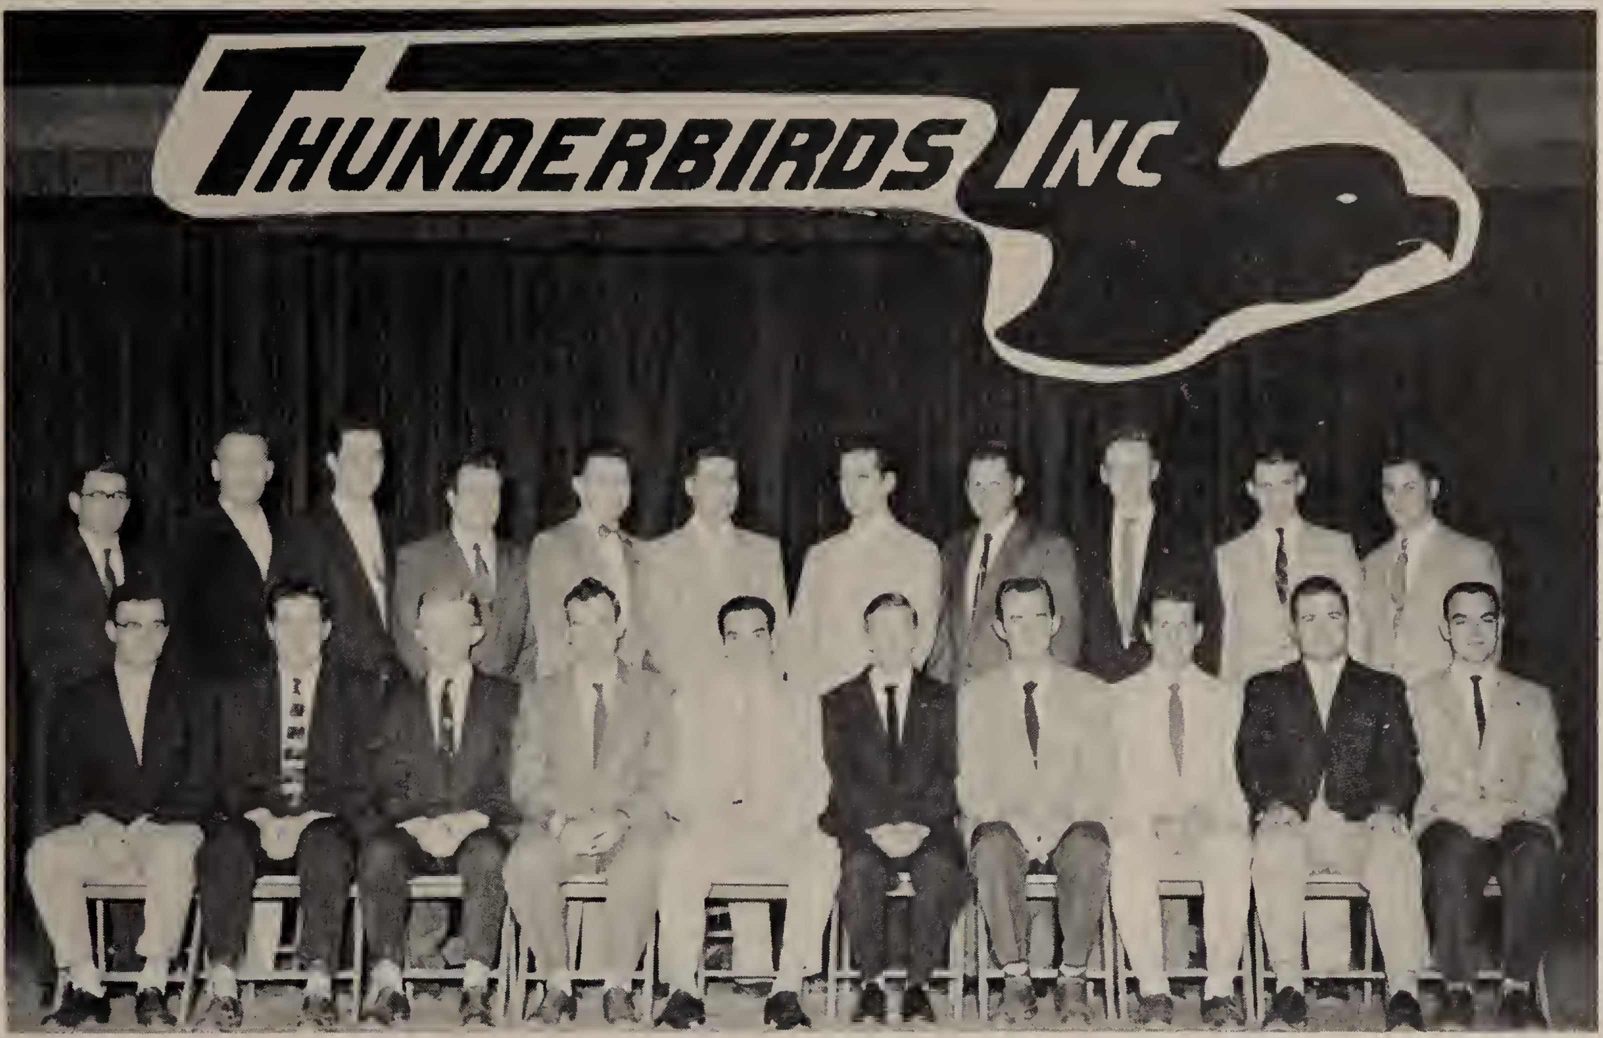
The International Students Association, is open to all students of the College. It's chief aims and purposes are to improve the relationship between the administration and the students, also to unite the students of foreign countries in an organization of fellowship whereby the culture of the students can be increased through the movies and lectures from students from countries overseas. Since the founding of the association, there has been a considerable amount of interrelation between the students and the citizens of Angola.



Left to Right, first row: Kenneth Vandygriff, Robert Wright, Donald Boyer, Erwin Wacker (President), Arthur Fontana (Vice-Pres.), Robert Ravenscroft, James Wilson, Robert Bahr, Richard Hudson (Secretary), Forrest Robinson. The Flying Thunderbirds Inc., is an outgrowth of the desire of a group of students to learn to fly without the usual expense entailed in such a project. A Corporation was formed in 1953 with the generous help of Professor Fred Goudy. Members buy a share in the aircraft owned by the organization and remain in the club as long as they desire. As each member drops out his deposit is refunded. The club is maintained by new members "buying in."

College Glee Club

During the fall quarter of 1953 the College Glee Club was organized by Mrs. Robert Ramsay, who serves as its director. Weekly rehearsals are held by the Club which has already made several public appearances. Programs have been given for campus events and the group has also given programs for clubs in the community and high schools in the surrounding area.

College Band

The Tri-State College Band, reorganized early in 1947 through the efforts of Roy C. Bodie, Jr., who serves as director, has made a number of concert appearances during the past year. The band also plays for campus and sports events. Program selections generally include a wide variation of selections and arrangements, proving the versatility of the musicians.

Although our basketball team came out on the short end of a 16 - 3 record this season, they showed plenty of "fighting" spirit all through the season. The Engineers were especially tough at home losing seven of the games by the narrow margin of an overage 1.8 points per game.

High scorer for the season was Al Brand, with an average of 16.5 points per game, Don Blair was a close second. Brand also won the free throw award with a .702 overage.

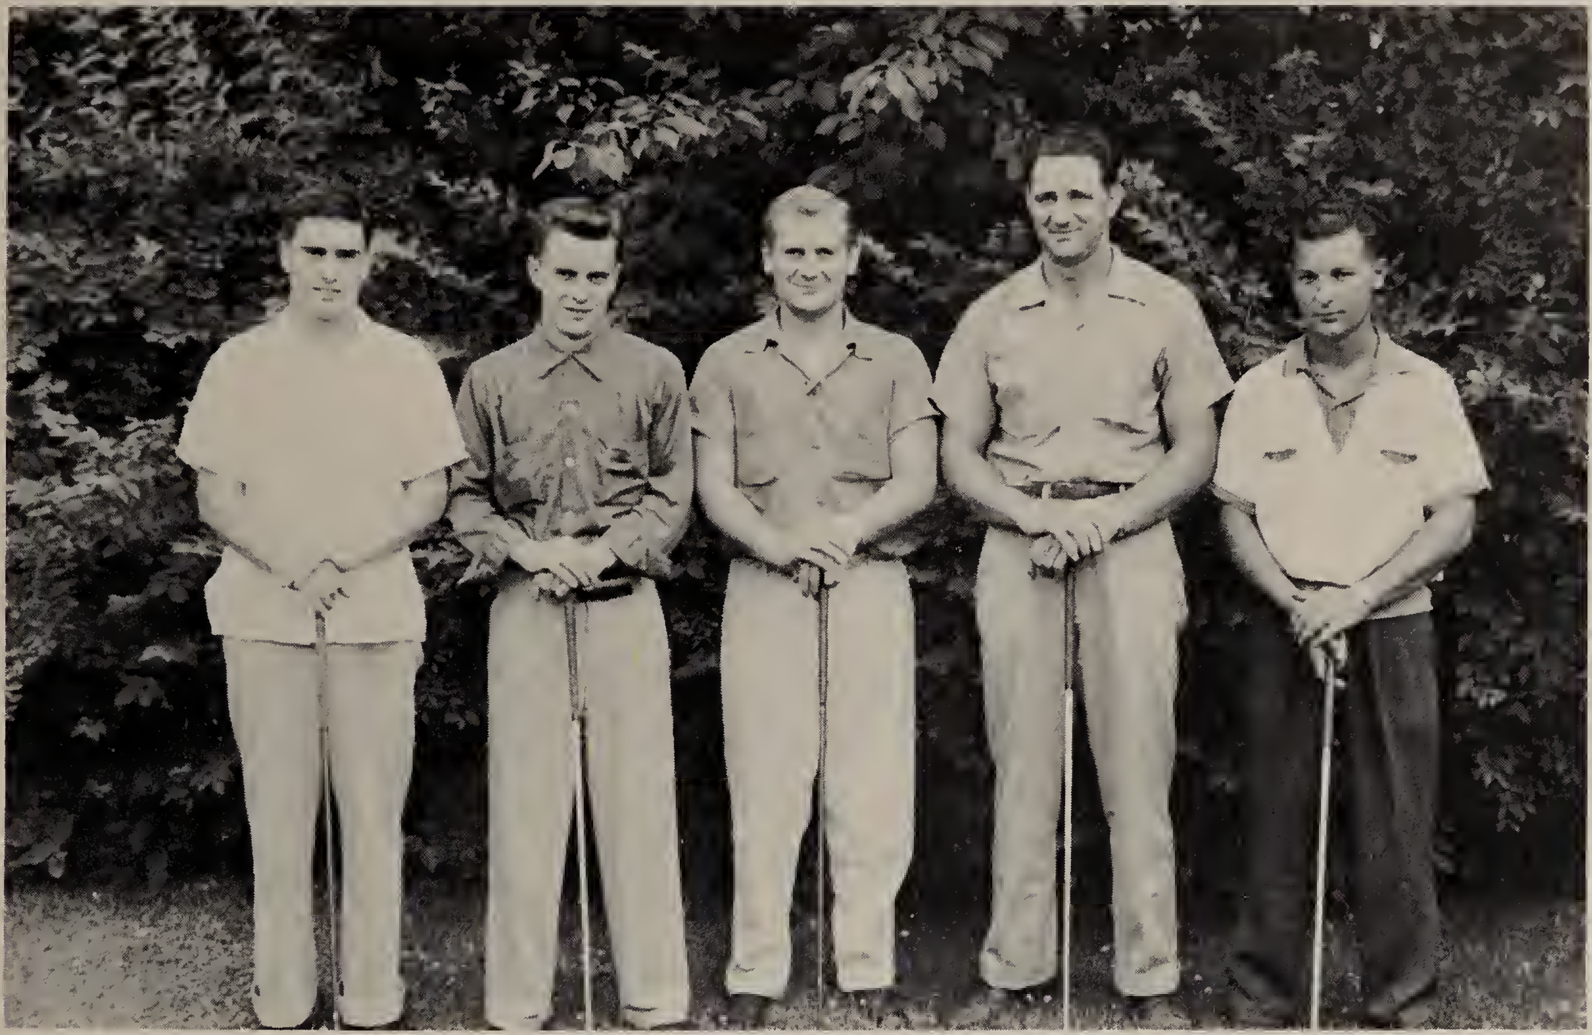
Tri-State's baseball team, playing against the weatherman and some of the top independents in the Tri-State area, compiled a 3 and 5 record last year. Delmar Luce, the ace of Doc Mummert's squad, got credit for two of the victories.

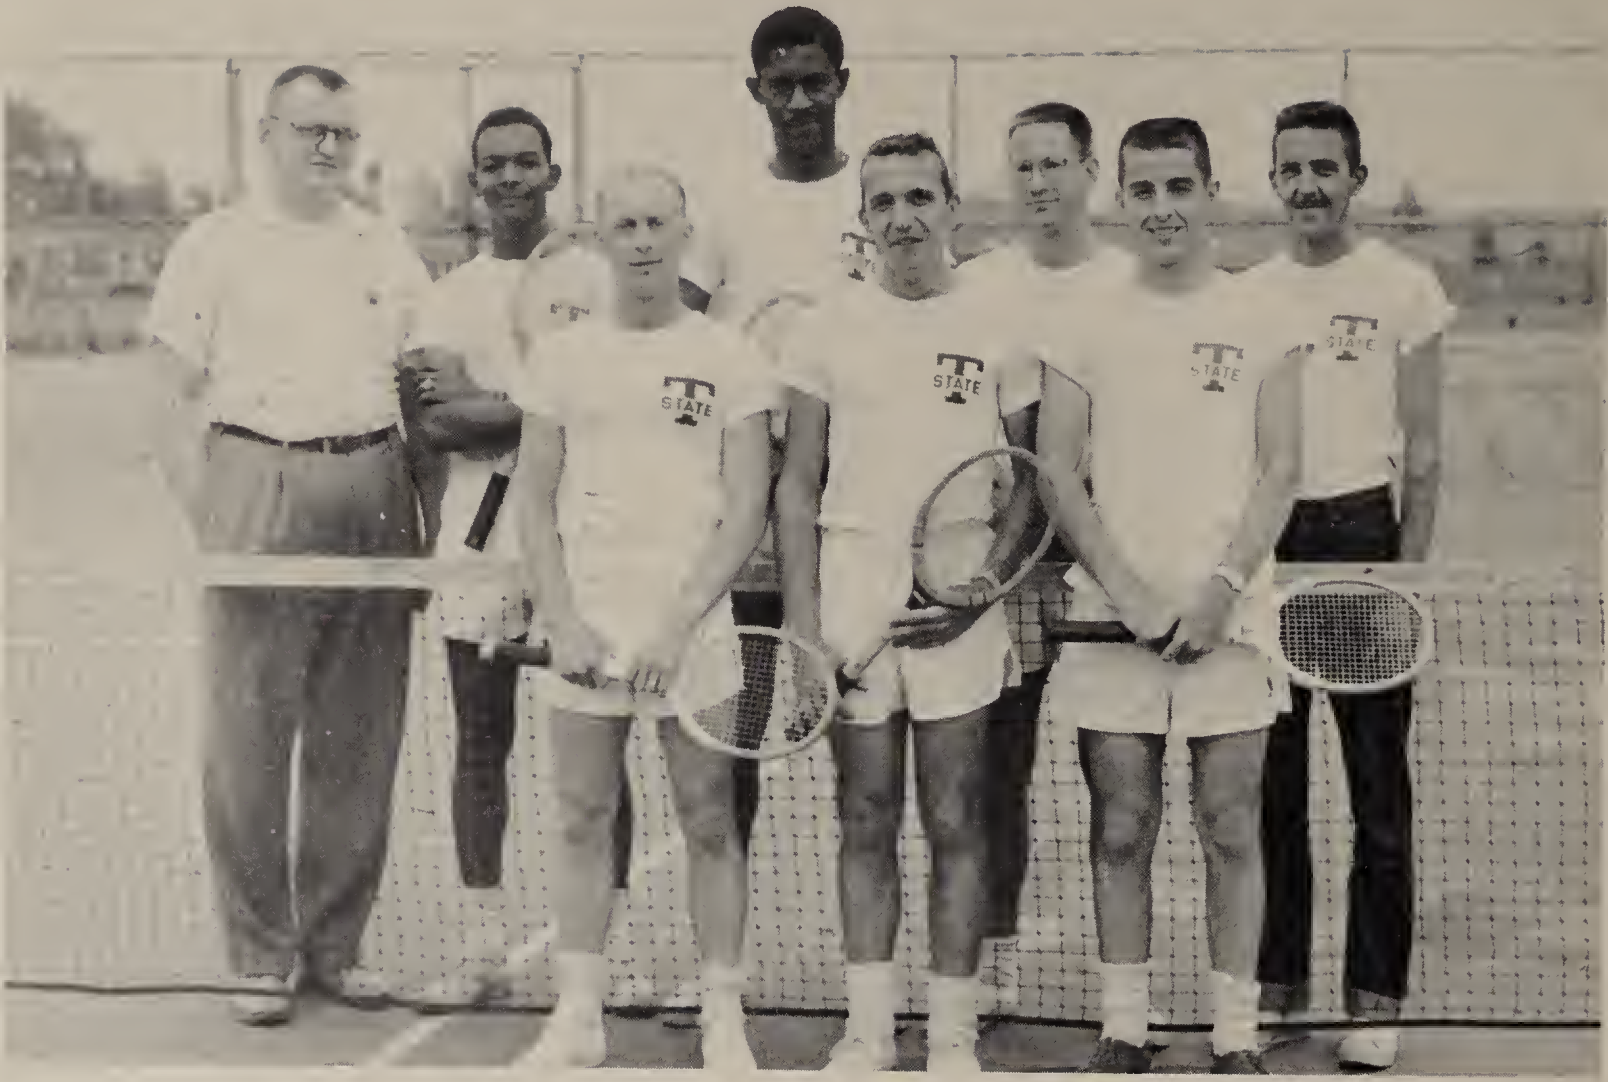
Golf



Left to Right: Jay Barrut, Bill O'Brien, L. Carich, Bob Baldwin, and Lew Durane.

The green and fairway boys here at Tri-State, probably get more actual fun out of playing golf than most of the other fellows do from their respective sports. The presidential pastime is a major sport at Tri-State. Coach Tony Adolina leads his boys into the sunshine against such top notch opposition as, Hillsdale College, Concordia College, Albion College, and Indiana Technical College.

Tennis



Pictured Left to Right: Coach Lyle Oleson, Willie Taylor, Gordon Hall, Al Rose, Bill Gertz, Ed Whetherhold, Jim Shuler, Bob Merrin.

The tennis team provided a bright outlook on the sport's scene. The Tri-Staters, coached by Lyle Oleson, won seven out of twelve dual meets last year, and the teom averoge of 0.770 in ninety games. The team had on especially good time agoinst Indiana Tech, who they blanked 9-0, 9-0, in two of the meets.

Tri-Angle Banquet Held At Moose

By Frank Allen

The winter quarter banquet for the Tri-Angle staff and their guests was held in the Moose Home on February 2[illegible]. There was a good turn out of members and guests, about 50 in all. This was a good representation of the members who backed the school paper during the term.

Bill Fraghn, editor in chief, spoke on the workings of the paper and presented the keys and shingles. Bill Fisher spoke on the cost of printing the Tri-Angle. Charles Miller, editor in chief for the coming quarter, expressed the wish that anyone interested in working on the Tri-Angle be at the first meeting next quarter. Here is a chance to pick up experience which may be of value in the future.

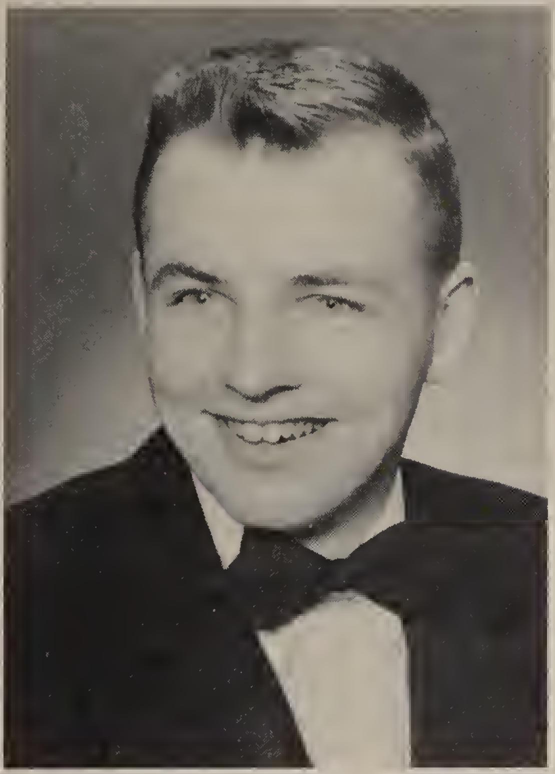
GAYLOR

Modulus Staff



PHIL O'BRIEN
Editor-In-Chief

The "Frank Buck" of Tri-State College, Phil brought back the Modulus, and anyone who has read it will agree that he brought it back alive!!

HARRY R. STELLING
Faculty Advisor

The "Link" between students and administration, Professor Stelling was always in the front row when there was work to be done, and in the background when praise was being given out.

MARTIN TAUMIN
Layout Editor

The real "Whip Cracker" of the staff, Marty's influence resulted in the assembly of the book in record time. Speed, however, did not deter the thought and taste put into every page.

CHARLES MacLAUGHLIN
Business Manager

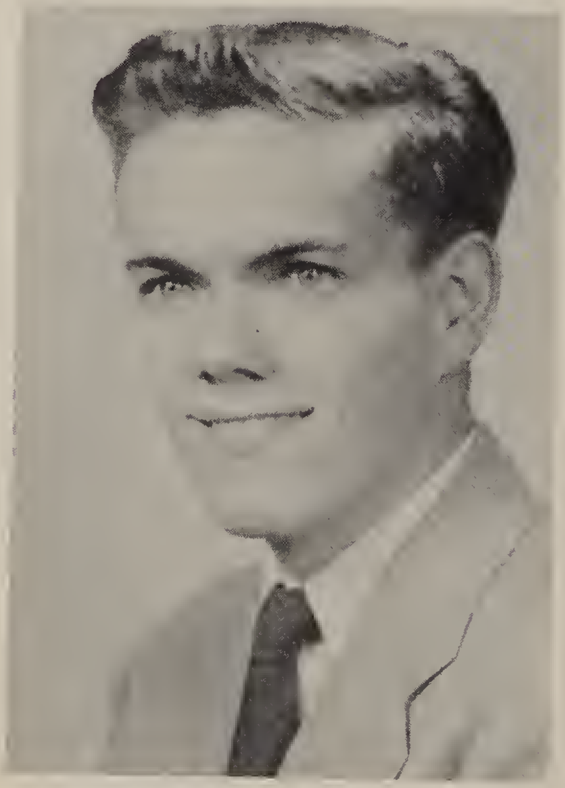
Financial tycoon of the yearbook, Mac did the unheard of by bringing the accounts out in the black. "A thousand dollars a week isn't so much if we have to have it!"

LUTHER FOLKS
Associate Editor

Luth's coordination of the individual staff members, and the pooling of their efforts greatly enhanced the careful assembly of the book.

DAVID WHITNEY
General Campus Editor

Upon Dave's shoulders fell the responsibility of putting more omph! in the yearbook, through the medium of a variety of snapshot, departmental, and athletic pages. It is obvious that the load was placed on the right pair of shoulders.



ROBERT FOOTE
Senior Picture Editor

The correlation of pictures and copy for six graduating classes was Bob's lot. In his spare time he became a proof reader extrordinaire, so if any wurds in this book are spelt wrung he's responsible!

DAVID CHASE
Fraternity Editor

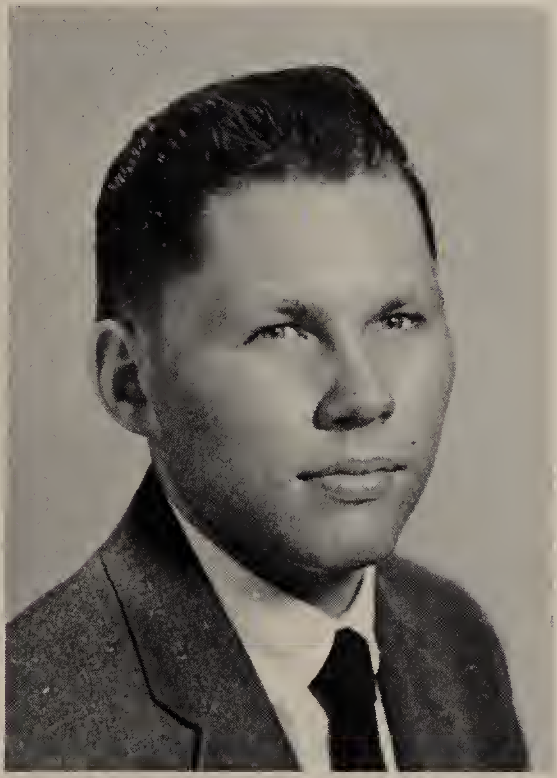
Dave was able to secure layouts for all of the fraternities in a short time, while still assuring a pleasing appearance for each.

CARLTON TAYLOR JR.
Staff Artist

Carlton's depictions of "Gloomy Gus" throughout the book give mute evidence of his talent with pen and brush.

LEON HARD
Photo Editor

The time worn phrase "a picture is worth a thousand words" proved to be just as true in 1956, and Leon, with the aid of his camera, accounted for a number of billions of words.



JOSEPH JELLEY
Society Editor

An attractive set-up of the various departmental societies was Joe's task, and he carried it out with taste and as in the case of all '56 staff members, with speed!

All the members of the staff of the 1956 MODULUS join in the wish that you will derive as much enjoyment from brousing through the pages of this book as they did in bringing the book back to you.
